

# CloudZenia AWS DevOps as a Service

**14+ Years of Cloud & DevOps Expertise**

# The Problem We Solve

Is Your AWS Environment Slowing You Down?

## Pain Points:

1

Releases take too long and often break in production

2

Infrastructure struggles when traffic suddenly grows

3

AWS costs keep increasing - but no one knows why

4

Security gaps are discovered late, increasing risk and exposure.

5

No dedicated DevOps team to scale with your product

# What We Do

**You Focus on the Product, We Power the Platform**

**Core Idea:** CloudZenia designs, automates, deploys, and manages modern cloud environments on AWS - so you can focus on product and growth.

## 3 Key Outcomes:

Faster,  
more  
reliable  
releases

Secure,  
scalable  
infrastructure

Optimized  
AWS costs

# Our Core Capabilities

## What CloudZenita Delivers

Capability	Tools/Services
Infrastructure as Code (IaC)	Terraform, OpenTofu, CDK, CloudFormation
CI/CD & Release Automation	AWS Code Pipeline, Code Build, Code Deploy, Git-based tools
Containerization & Modernization	ECS, EKS, Fargate, Docker, Lambda
Secure & Scalable AWS Architecture	EC2, RDS, S3, VPC, ELB, IAM, WAF, CloudFront
Monitoring & Reliability	Datadog, New Relic, CloudWatch, Systems Manager
Cost Optimization	Right-sizing, Savings Plans, lifecycle policies, budget monitoring

# How We Engage

## A Structured, Delivery-First Approach

### 5 Phases:

Clear milestones. No surprises. Measurable outcomes.

# Delivery Models

We Work the Way You Work

**1** **End-to-End Delivery**  
CloudZenita takes full ownership from strategy to execution

**3**  
Options:

**2** **Co-Delivery**  
We work alongside your engineers

**3** **Hybrid**  
Combined approach based on your needs

# Service Tracks

Pick What You Need - Or Combine For Maximum Impact

## Available Tracks:

DevOps Setup & Implementation  
(IaC + CI/CD + observability)

CI/CD Modernization  
(pipeline redesign + deployment strategies + Testing Integration)

Infrastructure Automation  
(Terraform/Cloud Formation standardization)

Container Migration & Modernization  
(ECS/EKS/Fargate enablement)

DevSecOps Enablement (security integrated into pipelines + runtime + IAM governance, scanning, and WAF)

# Why CloudZenita

## Trusted Expertise. Real Business Impact..

14+ years of cloud and DevOps expertise

Transparent, milestone-based Execution

1000+ AWS deployments delivered

Built for high-growth startups and scaling enterprises

Every delivery follows AWS Well-Architected standards

Support from experienced AWS & DevOps engineers

# Let's Build What's Next

Ready to Modernize Your AWS Environment?
